

**Pedihealth Oy**

## **Environmental Policy**

**Pedihealth Oy**

Pedihealth Ltd. is specialized in producing and distributing health care products. Pedihealth Ltd. markets and sells products to hospitals, health care centres, service producers and private consumers.

The beneficial environmental impacts of our operations are to take into consideration our environmental criteria in the product development, purchase, communication and logistics. In addition, we have organized the collection of electric and electronic scrap as well as batteries and accumulators. We try to consider the emissions of fossil fuels derived from distribution of products.

We use the natural resources with care and we aim to produce and market products that can be recycled and are made of renewable resources.

We lay environmental claims to both our interested parties and ourselves.

We continually improve our employees' environmental awareness and motivate them to participate in our environmental work.

Laws and regulations are our minimum requirements.

By following our environmental policy we guarantee the continual improvement.

Pedihealth Ltd's environmental policy is integrated into the company's business strategy.
